

VersaSeal...
the *ideal* print-to-mail solution for any type or size of business.

It's true... VersaSeal provides more than any other mailing system on the market. Efficient and trouble-free installation, an affordable price tag, and options for any business have made VersaSeal the undisputed leader. It's no wonder that since its introduction, VersaSeal has become the choice of hundreds of satisfied users. From governments to casinos, all kinds of businesses have benefited from the ease and flexibility of the VersaSeal mailing solution.

Look what they're saying about VersaSeal—the first (*and best!*) print-to-mail solution available today:

“VersaSeal is a system that offers real time and money savings benefits.”

— Bob Cullen, Hayward, CA

“Overall, I feel VersaSeal to be better than other fold-and-seal methods in the marketplace.” — Herb Levy, Allentown, PA

“VersaSeal will be a big push. People who want to get away from impact printing can make laser images using one generic stock.” — Mike Murphy, Florence, SC

“The system was so easy to operate we were up and running as soon as we opened the carton.” — Mary Stock, Anoka, MN

The Original Print-to-Mail Solution Just Got Better

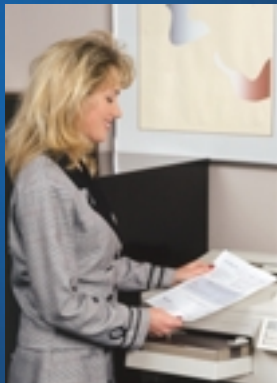

*Reduce costs, improve efficiencies,
streamline document processing
with the leading self-mailer system.*

Go From Non-Impact Printer to Mailbox in Record Time.

In two easy steps, the VersaSeal system allows users to create a self-mailer right at their desktop. Simply image the specially designed cut sheets in your non-impact printer, and then insert them into the folder sealer.

The VersaSeal method utilizes a special cohesive that is activated by pressure during the fold-and-seal process. Because the glue does not respond to heat or water, there's no need for messy consumables in the processing area, nor is there any danger of damaging sensitive office equipment. Since the self-mailer is created from a single cut sheet, you can eliminate envelope inventory and waste completely.

You'll save time and money immediately because the system eliminates labor-intensive activities like folding, stuffing and sealing. And this unique product meets all postal regulations, allowing you to incorporate automation features that can further reduce the costs of document processing and mailing.

Choose the VersaSeal System That Fits Your Business.

VersaSeal has the perfect form and equipment solution for all kinds of businesses and any size user. For small to mid-size businesses, VersaSeal offers equipment capable of processing 300,000 to 1.2 million documents per year, at speeds ranging from 7,000 to 11,000 sheets per hour. And for maximum volume requirements, our Model 2090 operates at speeds up to 30,000 per hour and 600,000 per month!

Unlike other self-mailing processes, VersaSeal does not require extensive user training, dedicated office space or large capital expenditures. The system is so easy to install and so operator-friendly it can be used within minutes of unpacking the carton.

Create a VersaSeal Form Designed Especially for You.

Custom options are endless, with features ranging from multiple inks and specialty papers to back printing and numbering. For negotiable documents, a wide variety of ABA recommended security features are available, including void pantographs, security inks and papers, microprint lines, watermarks, and print features that can be incorporated into your document.

All of our equipment will process C, V, Z and custom folds, and our forms can be adapted to meet specific printer requirements. Return envelope construction is also available.

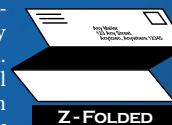

V-FOLDED

C-FOLDED

A complete offering of VersaSeal stock forms is available for immediate shipment from multiple manufacturing locations. Because these products are generic, all-purpose designs, they are perfect when a product is needed in small quantities or as a fill-in to a custom order.

The VersaSeal solution provides complete confidentiality for your sensitive information. When Z-folded, the center panel is completely enclosed within the mailer. This versatility makes the Z-fold format the most requested and most secure construction we offer.

Z-FOLDED

A Dependable Decision.

A nationwide service organization provides installation, employee training and service assistance. Each VersaSeal model is fully warranted for 90 days from the date of purchase, and extended service agreements are also available. Because of our total commitment to quality, we guarantee your satisfaction with our forms and equipment when they are properly used under recommended conditions.

VersaSeal ... an application for everyone.

The system is perfect for all kinds of applications, from invoices and statements to notices, packing slips and checks.
